Empowering

Climate Smart Agriculture Workshop

Are you interested in making your farm climate resilient?

The Department of Industry Tourism and Trade invites you to attend a free one-day workshop on Climate Smart Agriculture with a focus on building soil organic matter and water use efficiency.

Topics covered:

- Get the bigger picture on Climate Smart Agriculture and what it means to your farming business
- Understand how soil organic matter/carbon is related to climate resilience
- Learn the role of legumes, bio-char, compost, bio-fertilisers in climate mitigation, adaptation and productivity
- Learn ways of on-farm composting and types of compost
- Know climate projections for informed decision-making
- Know principles of regenerative agriculture in sustainable farming

When Friday, 19 May 2023	Time 8:45am to 4pm
Where Big Conference Room, AZRI Main Building, 519 South Stuart Highway, Alice Springs	RSVP via email to Girija.Page@nt.gov.au by 5th May for catering purposes
For more information please contact Dr Girija Page Girija.Page@nt.gov.au	Morning tea and lunch will be provided
